-  sound effect

CITY

VOLCANO

Interactive geography.
Build your own volcano with lava eruption.

-  1-6 persons

CHESS

ALPHABET

Application interactive equipment

EDUCATION

With the help of augmented reality, ordinary sand turns into the surface of the earth with lakes and mountains, volcanoes and valleys, animals, dinosaurs and much more.

Children study geography, the structure of planets, figures, learn to navigate in space, develop memory and logic.

MEDICAL CENTERS

Fine motility skills: interacting with sand the child stimulates all the nerve endings in all areas of the palm, develops tactile sensations, perception of smooth and uneven surfaces, the feeling of fine particles and loose material. The development of fine motility skills in children of preschool and primary school age.

ENTERTAINMENT

Many unique games and constant expansion of game modes will provide children with fun time for many years.

Augmented reality system RonplayBox

- 1 RECOGNITION NOT ONLY OF SAND, BUT ALSO PHYSICAL OBJECTS ON ITS SURFACE.
- 2 UNIQUE GAMES THAT HAVE NO ANALOGUES IN THE WORLD. EACH OF OUR MODES HAS ITS OWN UNIQUE MECHANICS AND ORIGINAL STORY, WE DO NOT PRODUCE CLONE GAMES.
- 3 THANKS TO THE UNIQUE SOFTWARE, THERE IS NO DELAY IN PROCESSING THE SAND SURFACE, WHICH ALLOWED US TO REALIZE SUCH DYNAMIC GAMES AS SANDBALL.
- 4 IT'S IMPORTANT FOR US THAT THE TACTILE INTERACTION IS PLEASANT AND THE PICTURE IS NICE AND WITHOUT DISTORTION, THAT'S WHY WE ALWAYS INCLUDE UNIQUE WHITE SAND IN THE SET.
- 5 OUR GAME COMPLEX IS CONSTANTLY EVOLVING. WE MAKE UPDATES AND DEVELOP NEW GAMES ON A REGULAR BASIS.
- 6 WE CONSCIOUSLY ELIMINATE ANY TABLET-TYPE INTERFACE FROM THE SANDBOX IN ORDER TO DEVELOP THE FINE MOTILITY OF CHILD'S HAND AND MOTIVATE KIDS TO INTERACT ACTIVELY WITH SAND.
- 7 OUR GAME COMPLEX DEVELOPS MOTOR SKILLS, COORDINATION, COOPERATION SKILLS AND MUCH MORE.
- 8 WE SUPPLY A HIGH RESOLUTION PROJECTOR WITH A WIDER RANGE OF COLOR RENDITION, WHICH MAKES GAMES MORE REALISTIC.
- 9 WE HAVE DEVELOPED ALGORITHMS FOR MORE ACCURATE RECOGNITION OF THE SAND SURFACE.
- 10 WE USE REALISTIC GRAPHIC MODES IN OUR GAMES
- 11 APPLICATION OF PHYSICAL SIMULATION WHERE EACH PARTICLE IS CALCULATED SEPARATELY.

"SPRING"
INTERACTIVE BOARD

Children interactive hardware and software system will help your child with learning new, training thinking and skills in an easy, playful way! The system comes along with educational games, tailored software with riddles, interactive math and different languages, illustrated fairy-tail books, where the child is supposed to take some actions, musical instrument games and exciting colouring books. It helps the child to elaborate memorizing, develop thinking, refine logic, focus attention and concentrate on the task.

RONPLAY KIDS produces products of any complexity on an individual customer demand. A large number of electronics developed by our company has no analogues.
